EIC Completes Work On New Motor Manufacturing Facility

Sparks Nevada, USA - January 25, 2010

While EIC has been manufacturing their own motors for quite some time, this work was done at a facility a few miles from the main manufacturing plant in Sparks, Nevada. A new facility adjacent to the main plant has now been constructed and is fully operational. The new facility houses the machinery required to manufacture all of the motor and generator stators for the cryogenic pumps and expanders, including winding, full testing, vacuum impregnation and curing oven.
