New Test Facility At Ebara Sodegaura

Sparks Nevada, USA 1/16/2009

Ebara has built a new, second cryogenic pump test facility, capable of testing pumps in LNG or LPG at Ebara's Sodeguara Plant in Japan. This second test facility complements the facility at the EIC headquarters in Sparks, Nevada, USA, and now gives EIC and EC extended flexibility to handle increased capacity. The new test facility includes two test tanks with a flow capacity of 3000 m<sup>3</sup>/h. a maximum pressure of 10MPa, and a maximum power of 2000 kW.
